NOTHING IS IMPOSSIBLE!

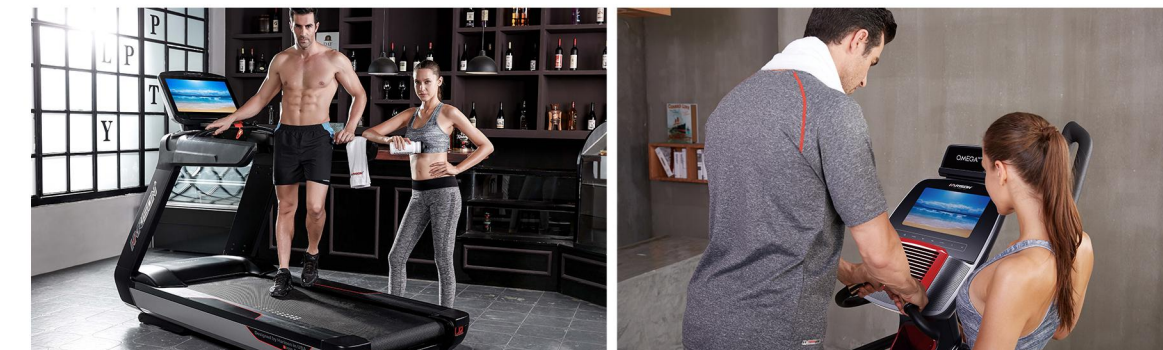

The greatest achievement in the world is to be ahead of the time and be superior to others

HARISON commercial training equipment, a collection of HARISON professional R & D team 28 years of experience in the industry, combined with sports engineering and modern technology, and finally stunning on the market. HARISON commercial training equipment will help you create high-end fitness clubs/fitness centers and commercial fitness places to accomplish more impossibilities.

Introduction

HARISON FITNESS has been established since 1996 in the United States. The founder, George Harison, liked to exercise and research sports equipment since he was a child. In the early days, we are mainly OEM for local brands in the United States, manufacturing aerobic fitness equipment and bar dumbbell equipment. In 1998, we began to develop and manufacture electric treadmills and water paddling equipment, and provided them to professional sports teams. Later, we focused on the R&D and manufacture of commercial gym equipment, long-term cooperation with many fitness clubs in the United States, and provided professional aerobic exercise and strength exercise equipment. We have professional research institutions such as "Aerobic Exercise Research Institute, Strength Training Research Institute, Functional Flexible Strength Research Institute, Dynamic Balance Laboratory". Up to now, HARISON has become a global comprehensive fitness brand integrating professional fitness technology, fitness equipment R&D, manufacturing and professional fitness training. There are branches in more than 60 countries and regions such as the United States, Europe, Australia, Mainland China, Hong Kong and Taiwan. We have more than 20 years of R&D and operation experience in competitive sports, sports rehabilitation, ergonomics and data interconnection, providing a full range of technical services and solutions for global fitness enthusiasts. In 2018, HANCHEN China reached the strategic cooperation with HARISON USA. By wholly acquiring the brand and global business of HARISON USA, positioning itself as a global professional sports and health technology company, we have been focusing on designing, developing, producing, and selling global high-end commercial fitness equipment and innovative home use products as well as providing interconnection and technology services for new generation. Since 2019 we have started to set up offline equipment flagship stores and international fitness academy sites globally which cover most developed provincial capitals in China, and have provided prestigious services to more and more Chinese fitness customers.
